PROFESSIONAL SUMMARY

Information Technology graduate specializing in Data Science with hands-on experience in software development, payroll operations, HR administration, and business process automation. Proven ability to develop web-based systems, analyze business requirements, and implement technology-driven solutions. Experienced in payroll processing, attendance management, remote system deployment, and database management. Skilled in Node.js, SQL, Python, and process automation tools, with a strong focus on problem-solving, continuous learning, and delivering efficient business solutions.

TECHNICAL SKILLS

- **Web Development:** HTML5, CSS3, JavaScript (ES6+).
- **Backend & Database:** Node.js, MySQL, PostgreSQL.
- **Programming & Data:** Python, Forecasting Logic, Data Analytics.
- **Tools & Platforms:** AnyDesk, Biometric Attendance Systems, System Deployment & Configuration, Git, Google Sheets (Automation), Microsoft Excel, MS Office
- **HR Systems Exposure:** Payroll Processing, Attendance Monitoring, Employee Records Management, HR Administration

TECHNICAL PROJECTS

Bio-ALMS: Biometric Attendance & Leave Management System | Capstone Project | Lead Developer

- Engineered a real-time attendance monitoring system using Node.js and JavaScript, contributing 85% of the total system development.
- Architected a leave request management workflow to automate employee tracking and improve processing speed.
- Developed forecasting logic to predict absenteeism trends by analyzing historical data patterns.
- Managed database integration using MySQL and PostgreSQL for secure, real-time data processing.

BBUBL: Ang Tipid App Hacks Ko | Founder & Lead Developer

- Designed and developed a personal finance tracking platform using modern web technologies and mobile application deployment.
- Implemented expense tracking, salary monitoring, attendance-based income recording, and financial history management features.
- Created automated financial summaries to help users monitor spending habits and personal cash flow.
- Developed a responsive mobile application version for convenient daily financial tracking.
- Currently enhancing the platform with shared budgeting and expense management features for couples.
- Managed end-to-end development, including system design, database structure, feature implementation, testing, and maintenance.

WORK EXPERIENCE

HR & Payroll Assistant (Part-Time)

February 2026 – Present

- Assisted in payroll processing, including attendance validation, lateness computation, deductions, and payroll record preparation.
- Managed and audited attendance records across multiple company branches, ensuring data accuracy and compliance with company policies.

- Maintained and updated employee information systems, including personal and employment data (contact details, birth records, etc.).
- Assisted in payroll processing, including tracking employee lateness, deductions, and purchase records.
- Supported daily HR operations, employee documentation, and administrative processes.
- Developed an automated OJT Time Tracking System using Google Sheets, enabling real-time monitoring of rendered and remaining hours.
- Conducted system testing and issue reporting for internal applicant management platforms.
- Provided remote technical support to branch offices by configuring biometric attendance systems through AnyDesk.
- Collaborated with the MIS Department to deploy and troubleshoot biometric attendance integrations across multiple branch locations, including remote sites.
- Demonstrated accuracy and accountability in handling payroll-related information and employee attendance records.

Administrative Assistant (SPES Program)

Barangay 195, District 2 (*March 2025*)

- Streamlined the distribution of cash allowances for senior citizen beneficiaries through organized verification and documentation.
- Managed digital attendance records and coordinated with staff to ensure an efficient administrative workflow.
- Delivered direct customer service and technical support to program beneficiaries.

Freelance Packer | Parcel Preparation & Logistics

(May – July 2023)

- Optimized logistics workflows for shipment accuracy across major delivery platforms.
- Maintained high-speed packaging standards while ensuring strict attention to detail and reliability.

EDUCATION

Universidad de Manila | Bachelor of Science in Information Technology with specialization in Data Science 2022 – Present

- *Dean's List (1st Year – 4th Year College).*

Arellano University Juan Sumulong | STEM Strand 2020 – 2022

- *Consistent Honor Student.*

CORE COMPETENCIES

- Data Analysis & Reporting
- Payroll & Attendance Management
- Technical Troubleshooting
- Process Improvement & Automation
- Team Collaboration & Communication
- Adaptability in Fast-Paced Environments
