PROFESSIONAL SUMMARY

Information Technology graduate specializing in Data Science with hands-on experience in full-stack web development, system deployment, and technical troubleshooting. Developed real-world web applications using Node.js, JavaScript, MySQL, and PostgreSQL, including a biometric attendance management system with predictive analytics. Experienced in deploying software, configuring biometric systems, and providing remote technical support while continuously building scalable and user-focused solutions.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), Python, SQL, HTML5, CSS3, JavaScript, Node.js, Express.js
- **Database:** MySQL, PostgreSQL
- **Technical Tools:** Git, GitHub, VS Code, Postman, AnyDesk
- **System Administration:** Application Configuration, Technical Troubleshooting, Biometric Device Configuration, Remote Technical Support

TECHNICAL PROJECTS

Bio-ALMS: Biometric Attendance & Leave Management System | Capstone Project | Lead Developer

- Developed a full-stack biometric attendance and leave management system using Node.js, JavaScript, MySQL, and PostgreSQL.
- Built a predictive attendance analytics module using Python and Pandas to forecast employee absenteeism trends based on historical attendance records.
- Led approximately 85% of the project's architecture, backend development, database design, API integration, and deployment.

BBUBL: Ang Tipid App Hacks Ko | Founder & Lead Developer

- Designed and developed a responsive personal finance management web application for expense tracking and budgeting.
- Implemented features including expense monitoring, salary tracking, attendance-based income recording, and financial history management.
- Managed the complete software development lifecycle from planning and UI design to database implementation, testing, and deployment.

WORK EXPERIENCE

MIS Staff / HR Staff (Part-Time)

February 2026 – Present

- Configured and enrolled newly hired employees into the company's biometric attendance system.
- Installed, configured, and troubleshoot company applications for branch computers through remote deployment using AnyDesk.
- Diagnosed and resolved software-related issues to ensure continuous business operations across multiple branches.
- Assisted in user account registration, employee system setup, and technical onboarding of new personnel.
- Collaborated with the MIS team in deploying attendance system updates and maintaining biometric device functionality.
- Supported payroll operations through attendance validation and employee time record verification.

LGU Representative (SPES Program)

Barangay 195, District 2 (March 2025)

- Maintained digital attendance records and administrative documentation.
- Assisted in organizing beneficiary verification and operational workflows.

EDUCATION

Universidad de Manila | Bachelor of Science in Information Technology with specialization in Data Science 2022 – Present

- *Dean's List (1st Year – 4th Year College).*
